

RICKY RUDIANSYAH

Computer Science Student · Purpose-Driven Builder

085780263299 · rickyrudiansyah15@gmail.com · [LinkedIn](#) · github.com/RickyRudiansyah · [Portfolio Website](#)

SUMMARY

Computer Science undergraduate at BINUS University (AI & Robotics Research Track) who builds from real human problems — not trends. Delivered a production QR ordering system for a real client, independently executed a full ML pipeline for a national spam problem, and validated a non-tech business from a market gap. The through-line in every project: I cannot build something that doesn't matter.

PROJECTS

Warkop QR · Lead Developer · Group Project (2 people) 2024 – Present

QR-Based Digital Ordering System for Real Business

Next.js 16 · TypeScript · Supabase · Tailwind CSS v4 · Vercel

- Built for a real client who needed a digital ordering system they could trust without relying on third-party platforms
- Production-ready with QR ordering, kanban cashier dashboard, kitchen ETA display, and owner analytics
- Iterated from v1 (React + FastAPI) to v2.9 (unified Next.js) — 25+ documented iterations, 22 API endpoints
- Production-ready and fully deployed — awaiting client's warung opening to go live; security hardened with RLS policies and auth guards

JudiGone · ML Engineer (Near-Solo Pipeline) · Group Project (Team Thesis) 2025 – Present

ML-Powered Online Gambling Comment Detector for YouTube

Python · YouTube API v3 · Qwen3-14b · Optuna · Multi-threading

- Identified a real national problem: gambling spam flooding Indonesian YouTube channels, affecting millions daily
- Built nearly the entire ML pipeline independently: scraping 75,000+ comments, annotation, EDA, feature extraction
- Trained 4 model architectures with Optuna hyperparameter search (30–50 trials per model) — 18,743 lines total
- Active thesis (Chapter 3 complete) — model trained, browser extension in development

SmartQuail · Mobile Developer (Flutter) · Group Project (2 people) 2024 – 2025

IoT Smart Monitoring System for Quail Farms

Flutter · Dart · Firebase Realtime DB · ESP32 · DHT22 · MQ-135

- Reframed a 'smart aviary' assignment into a real solution for Indonesian quail farmers after independent research
- Real-time monitoring of temperature, humidity, THI Index, and ammonia with auto-control of farm devices
- Selected for MIS Student Innovation Grant 2026 — Rp 7,400,000 in funding approved; built entirely self-directed

CocoGo · Founder & Team Lead · Group Project (5 people) 2025

Coconut Beverage Startup

Market Validation · Business Modeling · Pitch Deck · Competition

- Identified an untapped market gap on campus, validated the concept through surveys and recipe testing despite initial faculty rejection
- Led a team of 5 through the full competition process — BPC Finalist, Top 10, BINUS Entrepreneurship Festival 2025/2026

EXPERIENCE

Freshmen Partner · BINUS University Aug 2024 – Nov 2025

- Mentored and monitored 7 first-year students through academic and social adaptation at university
- Prepared and delivered study materials, practical tips, and progress reports to the department

Event Coordinator · UKM MT Al-Khawarizmi BINUS 2023 – 2024

- Hosted weekly Friday prayer sessions and religious study events as MC and organizer
- Coordinated logistics for Eid Al-Adha event including equipment inventory and resource verification

CERTIFICATIONS & AWARDS

- Top 10 Finalist — Business Proposal Competition, BINUS Entrepreneurship Festival 2025/2026
- Microsoft Azure AI Fundamentals (AI-900) — Microsoft & BINUS, 2025
- Introduction to Data Analytics — IBM & Coursera, 2025
- SQL for Data Analyst & Statistical Techniques — HaloTech Academy, 2025

EDUCATION

Bina Nusantara (BINUS) University — Jakarta, Indonesia 2023 – Present

Bachelor of Computer Science · AI & Robotics Research Track · GPA: 3.05/4.00 · Expected Graduation: 2027

SKILLS

Languages: Python, TypeScript, JavaScript, Dart, SQL

Frameworks & Tools: Next.js, Flutter, React, Supabase, Firebase, ESP32, Git, Vercel, Jupyter Notebook

AI / ML: PyTorch, scikit-learn, Optuna, Qwen3-14b, YouTube API v3

Spoken Languages: Indonesian (Native) · English (Intermediate — technical reading & writing)
